## Vetri lucidi - Glossy glasses

### Vetri lucidi - Glossy glasses

#### Descrizione

Description

I vetri lucidi sono caratterizzati da una superficie brillante e riflettente che dona un tocco di eleganza e luminosità agli ambienti. La loro capacità di riflettere la luce naturale o artificiale conferisce una sensazione di spaziosità e luminosità, creando un'atmosfera accogliente e invitante.

Glossy glasses are characterised by a shiny, reflective surface that lends a touch of elegance and brightness to rooms. Their ability to reflect natural or artificial light gives a feeling of openness and brightness, creating a cosy and inviting atmosphere.

Vetro extrachiaro lucido sp. 4 mm temperato, laccato nel lato interno con vernici a base acrilica.

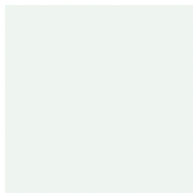

La vernice colorata viene applicata mediante spruzzatura, seguita dalla smussatura del perimetro e dalla cottura in forno per fissare la vernice e temperare il vetro.

Per la pulizia ordinaria utilizzare un panno inumidito d'acqua, per le macchie più resistenti utilizzare acqua calda e sapone neutro o detersivi in commercio per uso domestico, purché non contengano particelle abrasive o acidi che possano rigare o intaccare la superficie. Evitare di pulire le superfici con alcool o acetone. Si raccomanda la rimozione immediata di ogni tipo di macchia e di asciugare perfettamente le superfici al termine della pulizia.

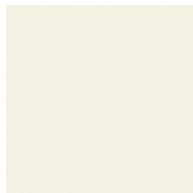

4 mm thick glossy extra-clear tempered glass, lacquered on the inside with acrylic-based paints. Coloured paint is applied by spraying, followed by beveling the perimeter and baking to fix the paint and temper the glass. For ordinary cleaning, use a cloth moistened with water. For more stubborn stains, use warm water and mild soap or commercial household detergents, provided they do not contain abrasive particles or acids that can scratch or damage the surface. Avoid cleaning surfaces with alcohol or acetone. It is recommended that all stains be removed immediately and that surfaces be thoroughly dried after cleaning.
