**Descrizione**

Description

Morbida con il fiore della pelle in bella vista. È la scelta preferita da chi ama la regolarità e vuole evitare i segni più superficiali del manto del bovino per apprezzarne solo il fiore della pelle. Come in tutte le pelli, il "decoro" naturale si allarga e restringe sullo stesso pezzo a seconda della parte del corpo da cui proviene. La pelle scelta da Dall'Agnese è ignifuga secondo la normativa statunitense CAL TB117 e quella britannica BS 5852.

Soft with the grain of the hide in plain view. This is the preferred choice for those who like regularity and want to avoid the more superficial marks of the cattle's coat to appreciate only the grain of the hide. As with all hides, the natural "pattern" widens and narrows on the same piece depending on which part of the body it comes from. The leather chosen by Dall'Agnese is fire retardant according to U.S. CAL TB117 and British BS 5852 standards.
